PROFILE SUMMARY

Bio-engineer and Neuroscientist with a PhD in Integrative Neuroscience, specializing in neurophysiology and neural networks computational modeling. I am motivated and detail oriented with a proven ability to lead cross-disciplinary research projects and collaborating with multiple teams I managed to bridge experimental and theoretical approaches in an innovative research project. Skilled in programming and data science, I am able to apply a wide range of laboratory methods such as patch-clamp electrophysiology to advanced neural network modeling. Self-driven and curious, I seek to leverage my skills in the biotech industry.

SKILLS

✓ Leading R&D project:

Defining scientific strategy, planning,
Coordinating with interdisciplinary research teams

✓ Programming:

Matlab, Python, Brian2, C++, SLURM, parallel computing

✓ Data analysis:

Signal processing, statistical analysis, kinetics analysis, parameter extraction

✓ Lab experiments:

Electrophysiology, immunochemistry, multi-electrode array, confocal microscopy

EDUCATION

2019 France Master Neuroscience
Paris Descartes University

2019 France Biotechnology Engineering
Supb'Biotech, Paris

2016 CA-USA Exchange
California State University

Languages

✓ French: Native

✓ English: Fluent

PROFESSIONAL EXPERIENCE

2026 (4 years)
Ontario, Canada

Western Ontario University
PhD candidate

- Neurophysiology patch clamp
- Neural network simulation
- Computer farm scan simulations
- Pharmacological analysis of dopamine effect on integrative properties

2020 (6 months)
Paris, France

Integrative Neuroscience & Cognition Center - INCC

Research internship

- Electrophysiology patch clamp
- Stereotaxic surgery
- Confocal microscopy
- MatLab

2019 (6 months)
Paris, France

Institute Psychiatry and Neuroscience - IPNP

Research internship

- Synaptic Plasticity in social memory and hippocampal neural network Immunohistochemistry
- In vitro electrophysiology recording field potential
- Behavioral study social memory

2017 (6 months)
Paris, France

Pasteur Institute

Research internship

- "Perception et Memory" Unit, supervised by Mariana Alonso:
- "Connectivity of mouse neurogenesis": Behavioral study memory; retroviral labelling; Confocal microscopy

2016 (2 months)
Vitry-sur-Seine, France

Sanofi pilot research

Internship

- Analytical techniques and standardization of a fermentation process
